

Akshat Jain

Ghatkopar, Mumbai 400075, India | akshatbjain.aj@gmail.com | +91 9425919685 | [LinkedIn](#)

Profile

Dynamic Software Engineer with 4+ years of experience, driving impactful solutions in full-stack development and data analytics. Expertise in crafting scalable applications and intuitive user interfaces, utilising a suite of technologies including JavaScript, React, and Python. Proven ability to enhance performance metrics through innovative architecture and real-time analytics, enabling significant improvements in operational efficiency. Adept at collaborating with cross-functional teams to deliver user-centric products that meet diverse market needs. Passionate about leveraging technology to transform complex data into actionable insights while supporting global usability.

Professional Experience

Software Engineer, Infinite Analytics, Mumbai

Aug 2023 to Present

- Led the development of a scalable BI platform (PowerBI-like) used for multi-platform campaign monitoring, enabling **better visualization & 40% faster performance analysis** through data-driven dashboard
- Architected a flexible chart-creation framework integrating Plotly, ApexCharts, Deck.gl letting user visualize and analyze any data they want.
- Built a resizable, Bento-style analytics dashboard to create custom insights with **zero engineering involvement**.
- Designed a **SQL query-builder** that accelerated and enabled custom chart creation and **supported geospatial + marketing datasets**.
- Implemented **Redis** caching and **RabbitMQ** queueing, cutting dashboard load times by **35%** and improving requests reliability.
- Integrated **New Relic** for performance monitoring and **Google Analytics** for usage tracking, improving observability and guiding product decisions.
- Implemented geospatial analytics dashboards using **Kepler.gl / deck.gl**; optimized query + delivery layer with **Trino, Redis caching, data compression**, and **SSE streaming**, improving report performance **20x** (5 min → 15 sec).
- Designed and implemented a **multi-agent AI system** to convert natural language into dashboards, reports, charts, and executable SQL queries using **LangGraph, LangChain, ChromaDB, FastAPI**, and **Gemini APIs**, improving data accessibility for non-technical users.
- Built a campaign performance optimization dashboard using advanced analytics to **speed up marketing decision-making**, and am currently developing a segment-level spend recommendation engine using Random Forest, MinMaxScaler, and TensorFlow/Keras-based RNN models.

Founder & Full-Stack Developer, Finemate, Indore

May 2022 to Jul 2023

- Designed, built, and deployed a full-stack **learning platform** aimed at improving **long-term memory** through **spaced repetition, social learning, and gamified engagement**.
- Developed a **React**-based frontend and **Flask** backend, delivering a responsive, SEO-optimized web app with an intuitive user experience.
- Implemented Single-sign on(SSO) to support login using Google, Meta and LinkedIn.
- Created a **flashcard system and social-media-style interface** supporting interactive learning, collaboration, messenger features, graphical to-do lists, and community engagement.
- Built a custom content-creation platform using H5P and WYSIWYG tools to support infotainment posts and question-based learning modules.
- Managed end-to-end UX/UI design, content writing, and product strategy—including research in **cognitive science** to guide feature development.
- Implemented scalable backend services using **MongoDB, MongoEngine, REST APIs, AWS** deployment, and modern UI libraries like **Material UI** and **Bootstrap**.

Software Engineering Intern, SI Online, Ratlām

Jan 2022 to Apr 2022

- Developed and maintained applications using MERN stack, contributing to core modules such as **IRCTC Agent Registration, AEPS, and Video Tutorials**.
- Built backend APIs to enable fast, reliable querying of analytical data for IRCTC agents, improving data accessibility and operational efficiency.
- Collaborated on feature enhancements and module optimizations, ensuring secure, scalable, and high-performance backend workflows.

Education

Shri Vaishnav Institute of Science and Technology, Indore

Bachelors in Information Technology, Jul 2018 to Jun 2022

Patidar Higher Secondary School, Dhar

12th

St. George Higher Secondary School, Dhar

10th

Technical Proficiencies

Languages:	JavaScript, TypeScript, Python
Frontend:	React.js, Next.js, Redux, Redux-thunk, TanStack, BootStrap, Tailwind, Material UI, Radix, Plotly.js, Apexchart.js, Chart.js, D3, Kepler, React-hook-form, Streamlit, HTML5, CSS3
Backend:	Node.js, Express.js, Nest.js, Flask, FastAPI, Django, MongoEngine, PYMONGO, SQLAlchemy
Database:	MySQL, PostgreSQL, MongoDB, ChromaDB, Firebase, Redis, RabbitMQ, Elasticsearch, Cassandra
Other tools and technologies:	Docker, Selenium, BeautifulSoup, AWS, IAM, Lambda, VPC, EC2, S3, Route53, Nginx, Pandas, Numpy, Matplotlib, Figma, Github, Github Actions, Wordpress, Websocket, WebRTC, Splunk, Superset, Trino, Auth0, DataDog, N8N, MCP
Learning:	Pinecone, Neo4j, RAG, CAG, LangChain, LangGraph, LlamaIndex, Airflow, React Native

Artificial Intelligence & Machine Learning using Python, Ardent Computech
